

# Rololight Booth Integration™

Modernize the traditional pop-up booth with this new backlighting system.

Rololight® Integration is a universal lighting system that allows any pop-up or custom booth to be backlit.

### ROLOLIGHT BOOTH INTEGRATION™

The ROLOLIGHT BOOTH INTEGRATION™ is a tradeshow industry first and helps turn a regular booth into an attractive and unique eye catching display. This universal lighting panel is made to fit the Expand MediaWall, Expand 2000 and most other pop-up booths on the market. This patent pending lighting system allows a booth to be lit-up from the inside out so your graphics will demand extra attention.

Each ROLOLIGHT panel is lightweight and can be rolled up for ease of transport and storage. Lights have a hard protective sleeve and a life of up to 10,000 hours. Lighting up the whole booth only requires one electrical outlet. Think green, think Rololight!

The ROLOLIGHT BOOTH INTEGRATION™ panels install in minutes, disassemble in seconds and are a perfect way to modernize an old pop-up booth with a new fresh look.
